Introduction and Purpose

This report is created and prepared by the Pennsylvania Office of Mental Health and Substance Abuse Services (OMHSAS) within the Department of Human Services. The information contained within this report is extracted from the Patient Tracking System (PTS) of the State Facility Tracking System. The medical records staff at each of the six state hospitals and one restoration center are continually updating PTS with the necessary information of any individual served.

The purpose of this report is to provide the reader with an overview of lengths of stay, demographics, and diagnosis information, indicated on the last day of the month for each of the state hospitals unless otherwise indicated. This report is a limited data set designed for the purposes of research, public health, or health care operations in accordance with 45 C.F.R. § 164.502.

Counts of individuals that are 10 or less are replaced with the designation of “<11” to protect the confidentiality of individuals in accordance with the Department’s data governance policies.

Each table, chart, and graph are labeled regarding the content contained within the visualization. For definitions of terminology and data used, please refer to the appendix.

End of Month Census for Calendar Year (CY)2021

Number of patients discharged during the year by length of stay in the state hospital system by facility and level of care.

The plots in this section detail the distribution of lengths of stay at each state hospital and are separated by level of care. This section also contains plots that detail the average length of stay for each state hospital.

Mean and Median Lengths of Stay of Patients as of December 31, 2021

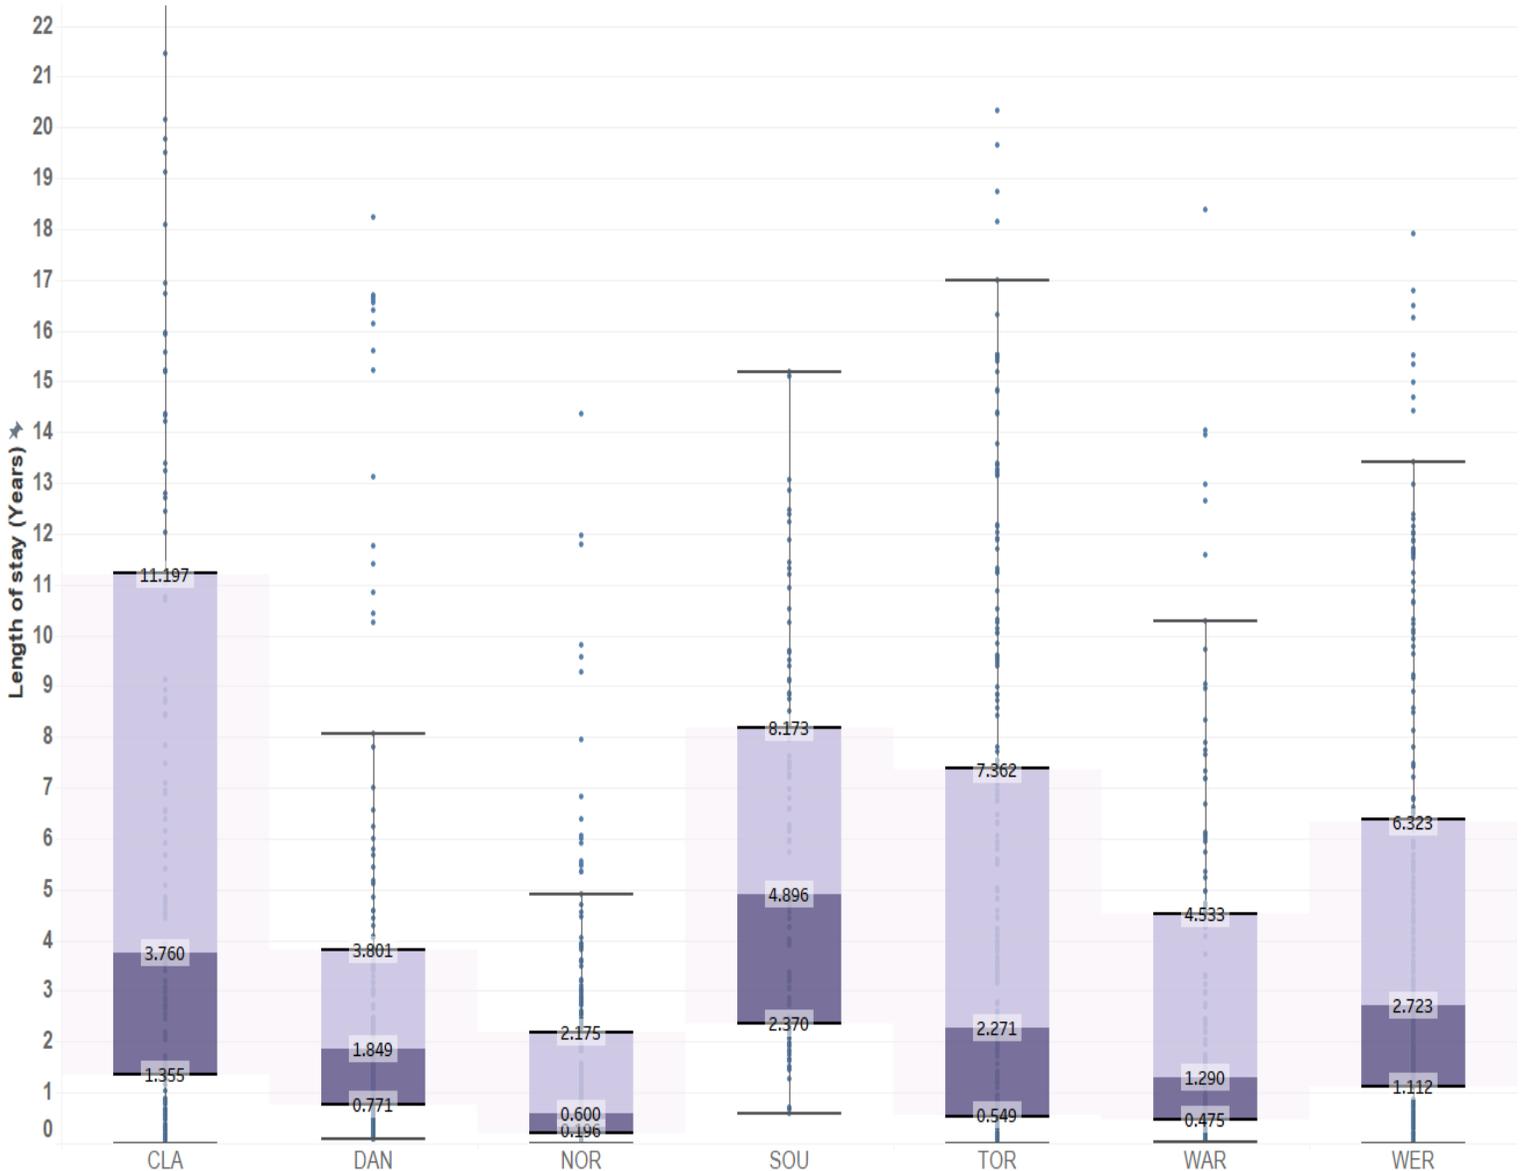

Measure	Psychiatric						Forensic		Long Term	S RTP
	CLA	DAN	NOR	TOR	WAR	WER	NOR	TOR	SOU	TOR
Mean	7.52	4.18	6.79	4.57	3.89	4.86	1.56	1.65	5.69	9.47
Median	3.76	1.85	2.75	2.11	1.29	2.72	0.54	0.47	4.90	9.45

Mean and median lengths of stay by facility and level of care in number of years.

Distribution of Lengths of Stay of Patients as of December 31, 2021

The next 5 tables use Box and Whisker plots to display the data. The colored part of the box is the middle 50% range of the data.

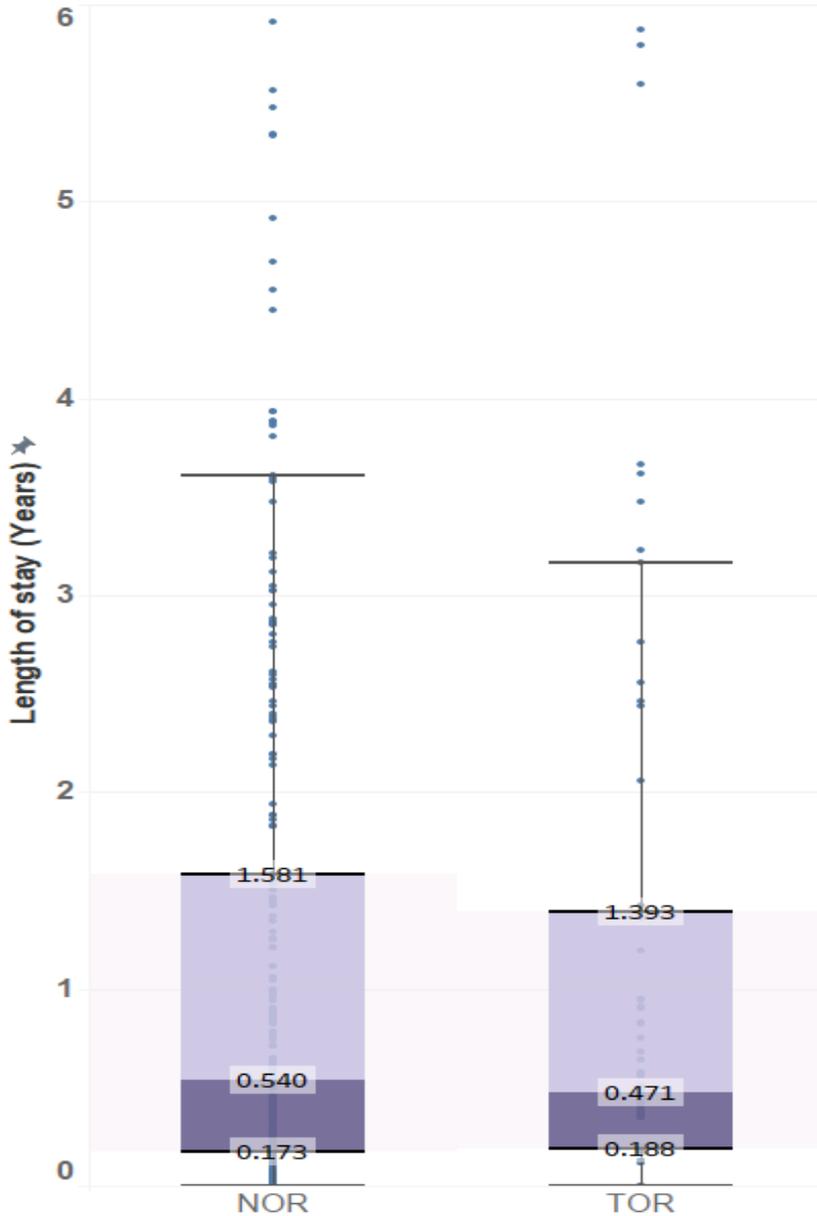

Distributions of Lengths of Stay

This boxplot displays the distribution of lengths of stay for patients in psychiatric care. The lower and upper ends (labeled) of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 22.4 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

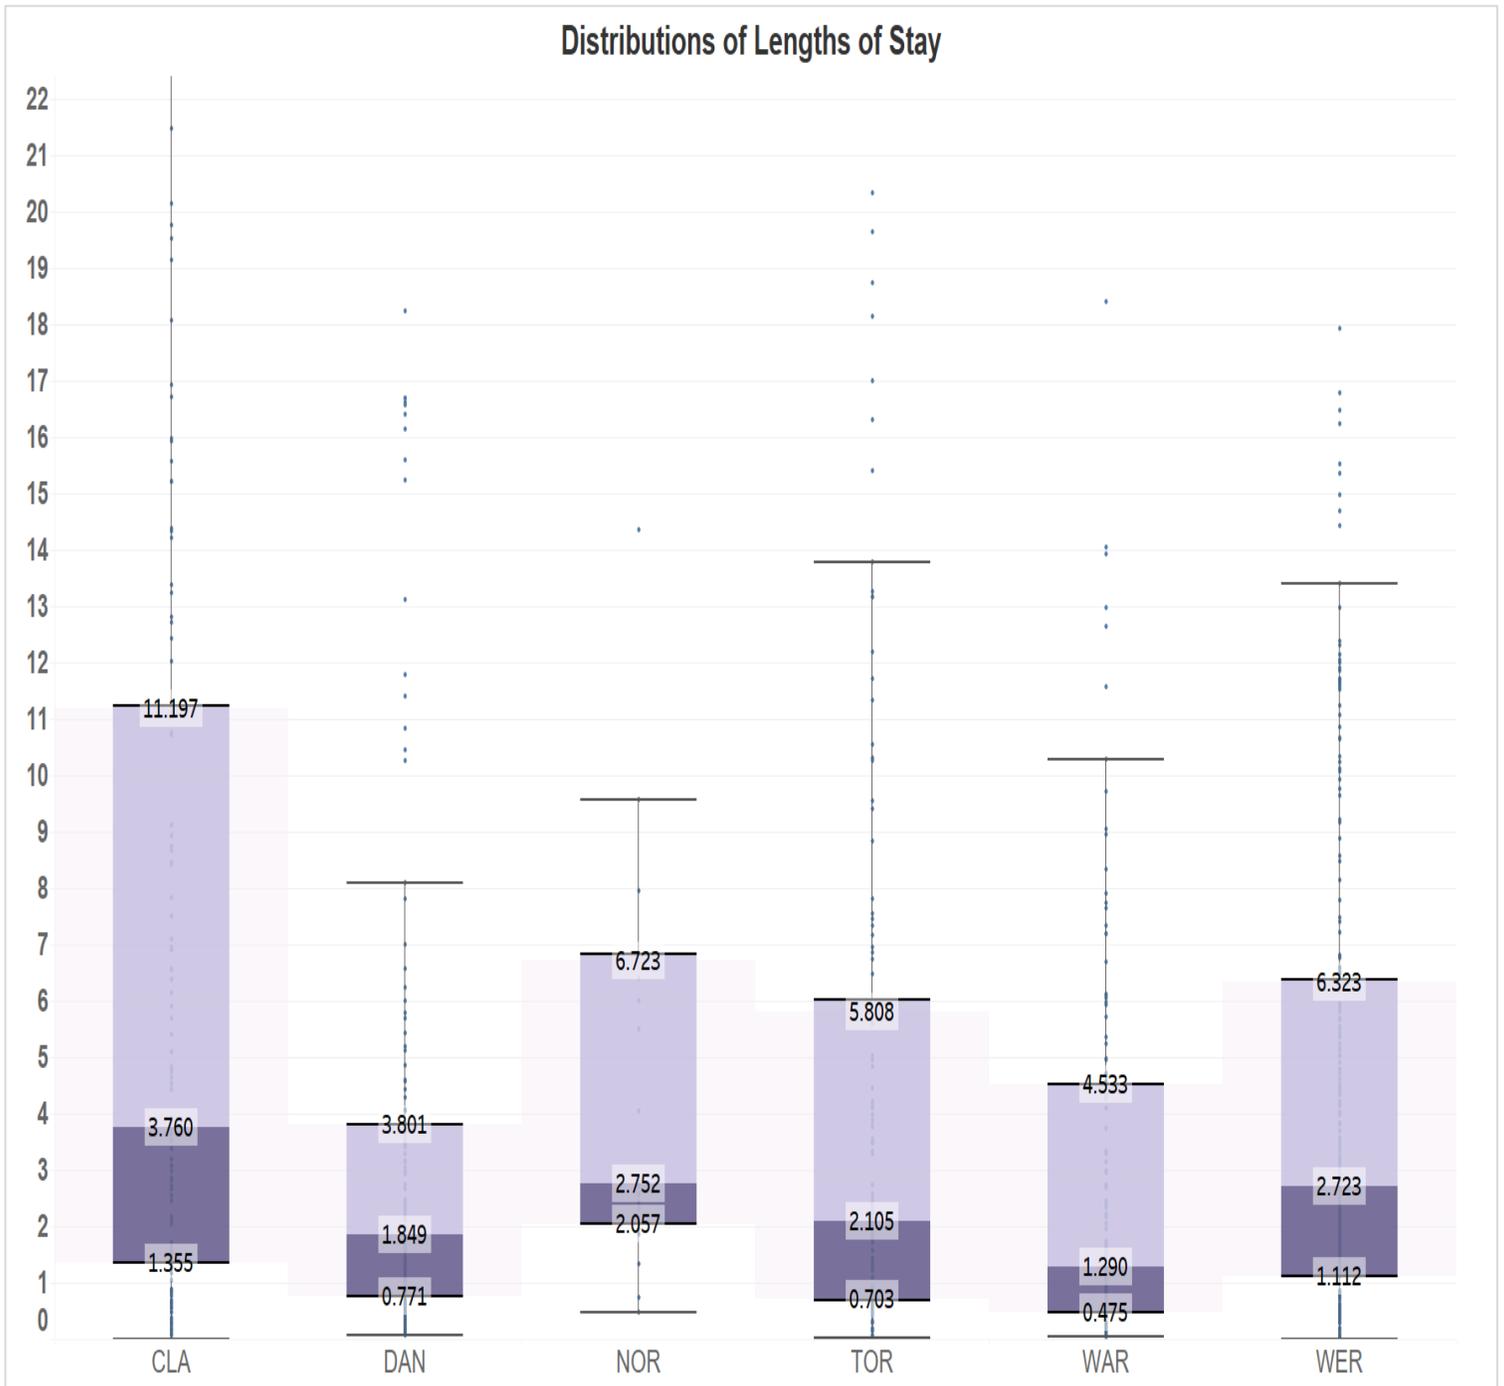

Distribution of Lengths of Stay of FO Patients as of December 31, 2021

Distributions of Lengths of Stay

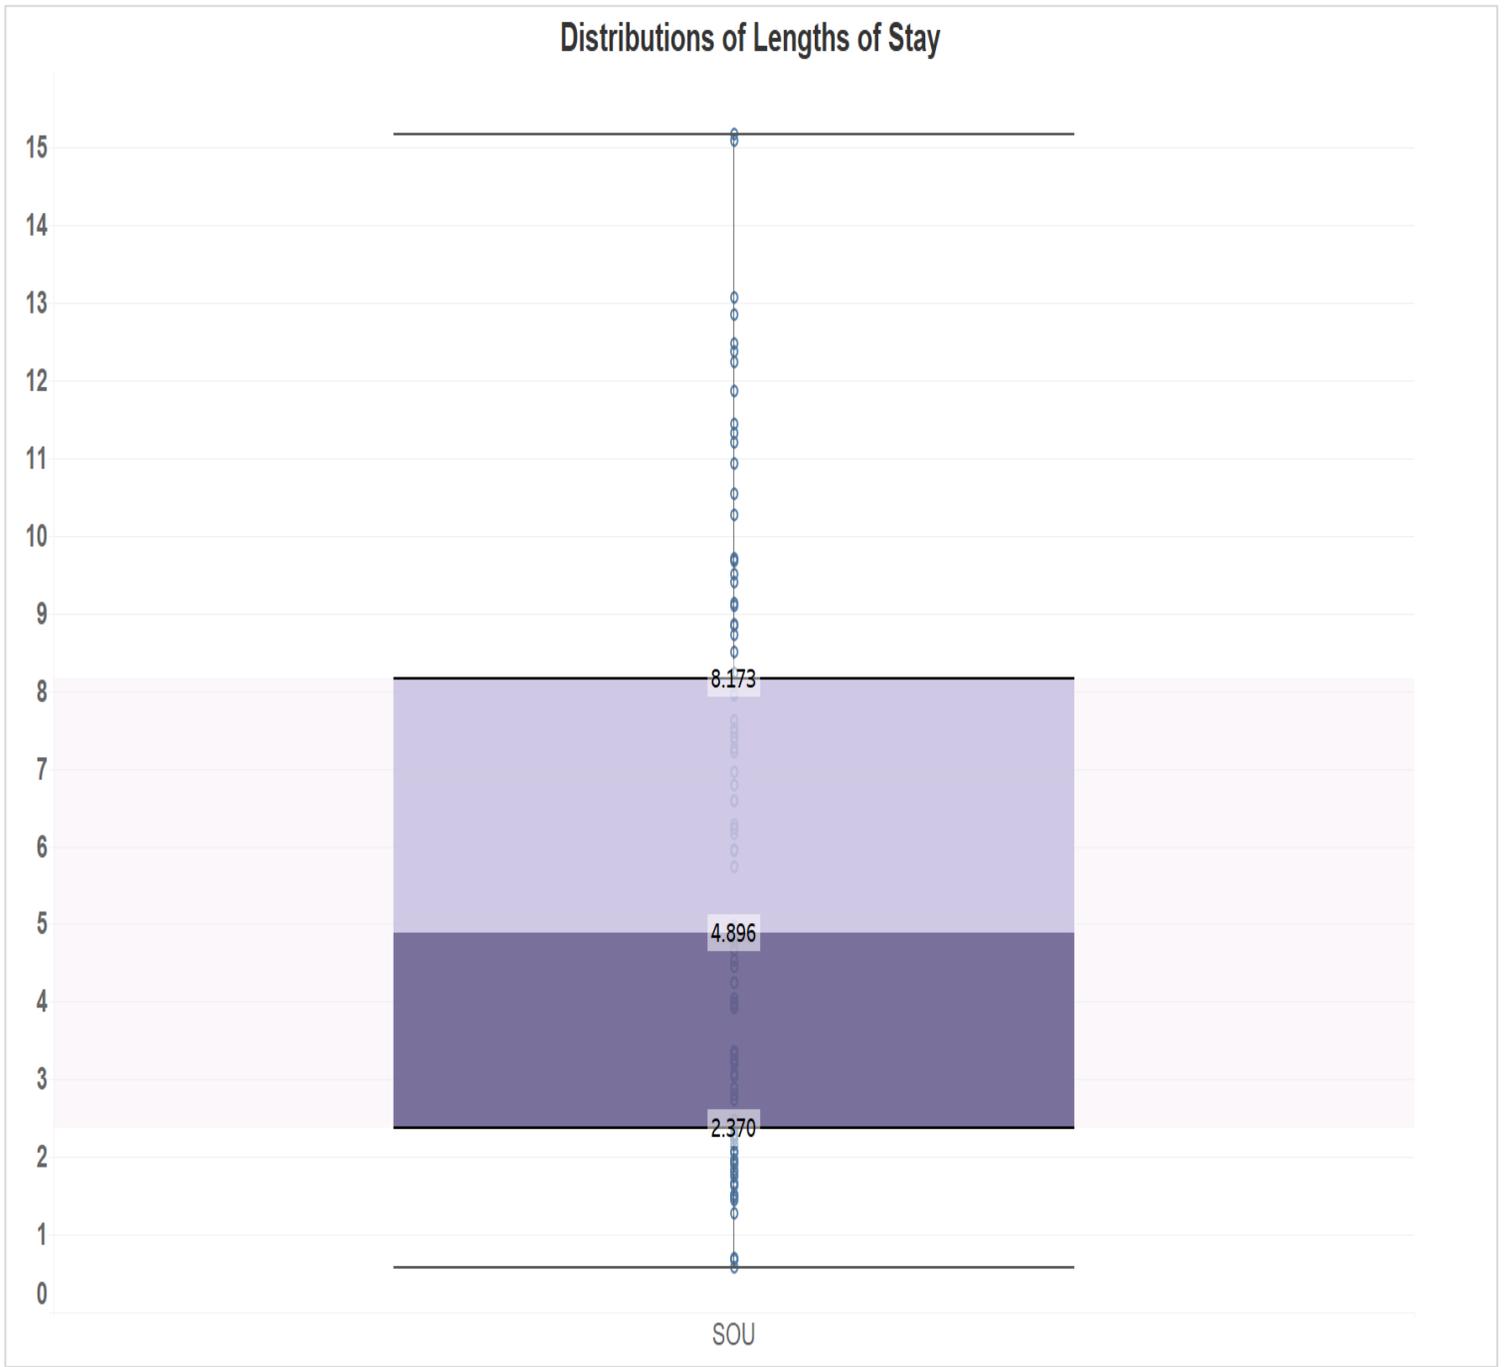

This boxplot displays the distribution of lengths of stay for patients in forensic care. The lower and upper ends (labeled) of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 3.2 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of PS Patients as of December 31, 2021

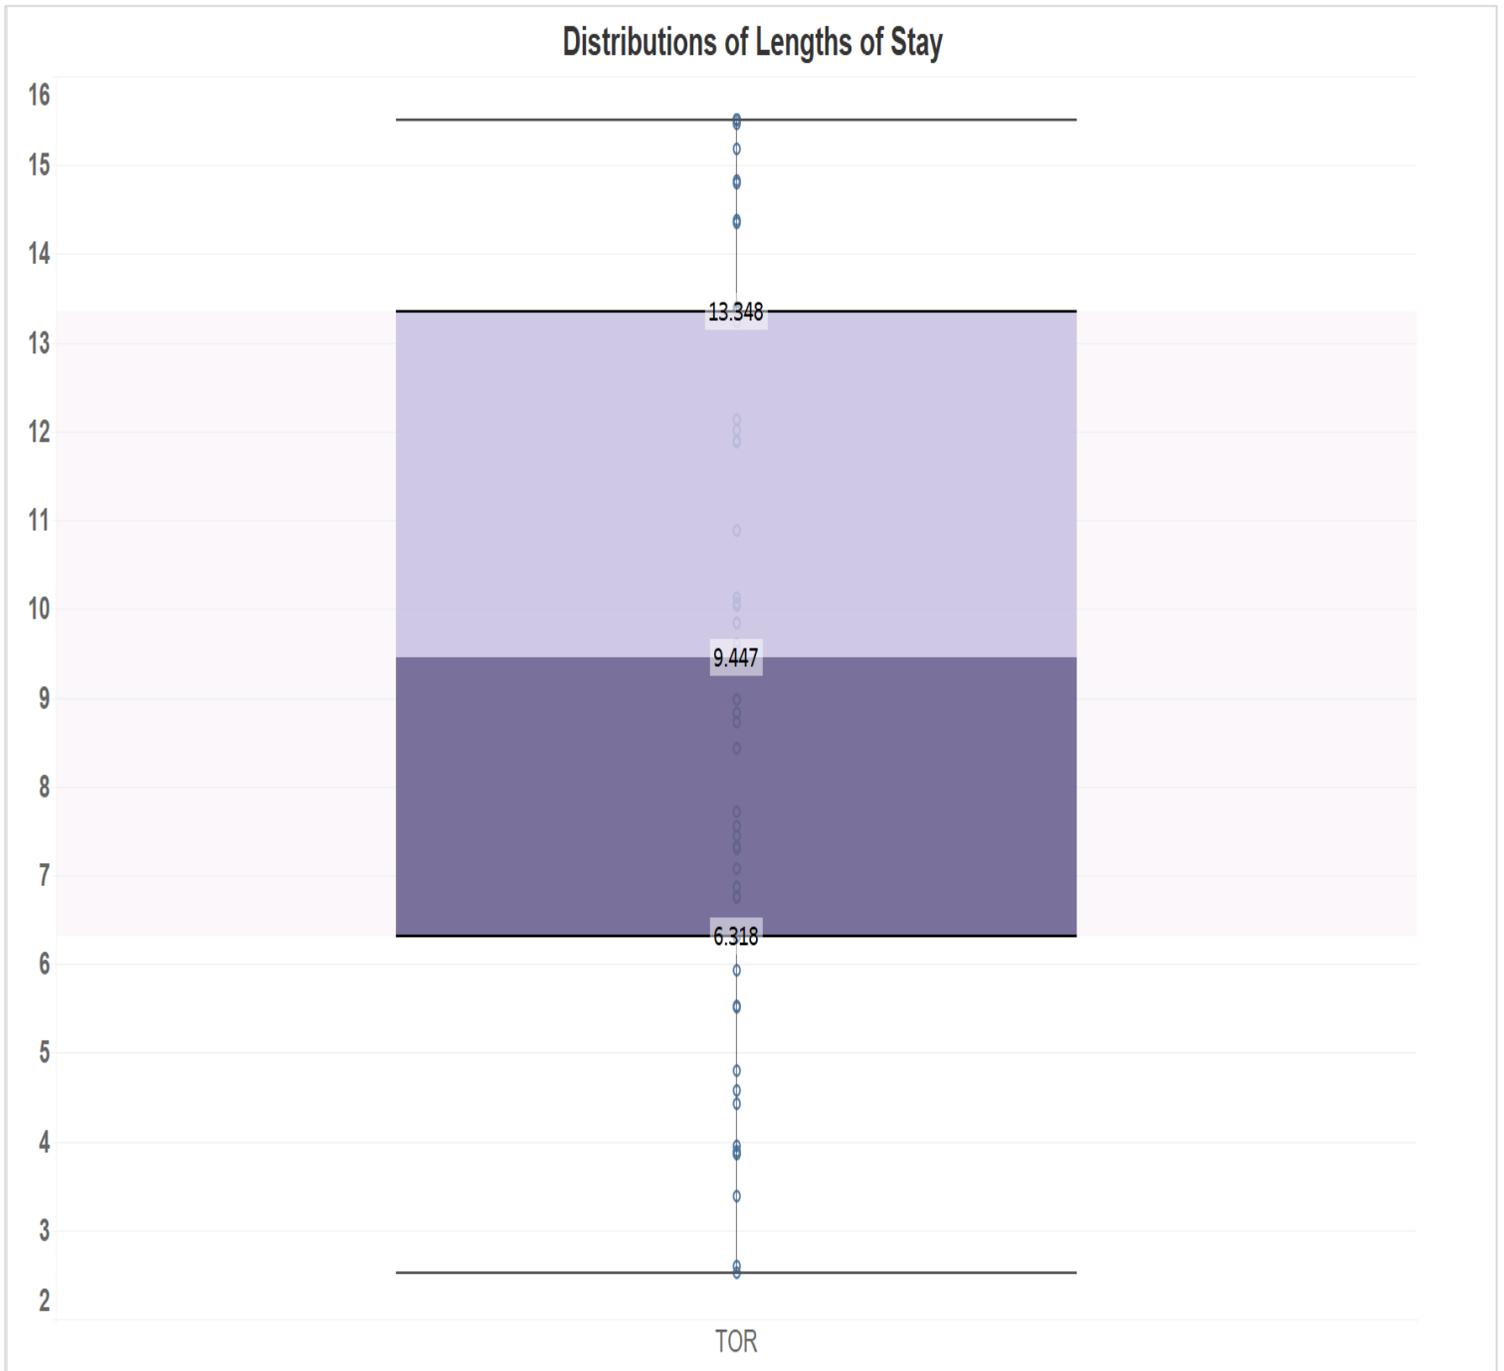

This boxplot displays the distribution of lengths of stay for patients in psychiatric care. The lower and upper ends (labeled) of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 22.4 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of LTC Patients as of December 31, 2021

This boxplot displays the distribution of lengths of stay for patients in long term care. The lower and upper ends (labeled) of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 16.4 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of SRTP Patients as of December 31, 2021

This boxplot displays the distribution of lengths of stay for patients in the sexual responsibility and treatment program. The lower and upper ends (labeled) of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 26.7 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

County of Origin for New Patients

This section breaks down the new patients in the state hospital system by county of origin and provides the raw counts of patients admitted from each county as well as that county's total population. Additionally, these charts display the percent of all new patients that were admitted from each county, and the percent of the PA state population that resides within that county.

If no patients from a given county were committed to the state hospital system or the specific level of care during the year, then that county will not be displayed in the table.

County of Origin for All New Patients for CY2021

County	Population	% PA Population	Admissions	% Admissions
Adams	103852	0.799%	<11	0.105%

Population of Pennsylvania counties, percentage of the Pennsylvania population, number of patients admitted with a forensic level of care during the year from each county and the percentage of total admissions from that county.

County of Origin for New LT Patients for CY2021

County	Population	% PA Population	Admissions	% Admissions
NULL	0	N/A	<11	100%

Population of Pennsylvania counties, percentage of the Pennsylvania population, number of patients admitted with a long-term level of care during the year from each county and the percentage of total admissions from that county.

County of Origin for New SRTP Patients for CY2021

There were no SRTP Admissions during CY2021.

Census by Diagnosis Type

The following tables detail the census for each state hospital, separated by level of care, for patients by the category of behavioral health diagnosis. *Please note that patients may have multiple diagnoses and may therefore be represented on each table more than once.*

Behavioral Health Diagnosis of Patients as of December 31, 2021

Diagnosis	Psychiatric							Forensic			Long Term	S RTP	System

Appendix

Glossary of Terms

- Level of Care
 - PS: Psychiatric Care; a.k.a. (Civil Units)
 - FO: Forensic Care
 - LT: Long Term Care
 - SRTP: Sexual Responsibility and Treatment Program (Act 21 of 2003)

- State Hospital Abbreviations/Facility Codes
 - CLA: Clarks Summit State Hospital
 - DAN: Danville State Hospital
 - NOR: Norristown State Hospital
 - SOU: South Mountain Restoration Center
 - TOR: Torrance State Hospital
 - WAR: Warren State Hospital
 - WER: Wernersville State Hospital

Data Sets

- Patient Tracking System (PTS)
 - These data are extracted from the Pennsylvania Department of Human Services State Facility Tracking System. The extraction date of the data for this report is May 2nd, 2022.

- Pennsylvania County Population Data
 - These data are pulled from the U.S. Census Bureau’s American Community Survey.
 - United States Census Bureau, Population Division. (June 2019). *U.S. Census Bureau, American Community Survey 1-Year Estimates* [CSV file]. Retrieved from <https://data.census.gov/cedsci/table?q=pennsylvania%20population&g=0400000US42.050000&tid=ACSDT1Y2019.B01003&hidePreview=true>
 - This data set provides population estimates for each year from 2010 through 2019.

Methodology

- Null/Missing County Data
 - 19.87% of the records in the PTS data set contain missing county data.
 - Within the PTS data set, the county MH program is also recorded.
 - For each record with missing county data, the county corresponding to that patient’s county MH program of record will be used instead. This completes the data for County.

- Population Estimates
 - The U.S. Census Bureau typically releases new population estimates each June for the previous year. Therefore, all calculations in this report that require population counts are conducted using population counts from the previous year.
 - Populations for each area tend to have little variation in the span of a single year, so the estimates from the previous year will be considered an analogous and valid alternative.

- County of Origin for New Patients
 - It should be noted that patients listed as “Out of State” are not included in calculations of the origin county.
